Introduction

Hypersonic network is an experimental ERC20 token deployed on Ethereum Blockchain. H2N is the latest collaborative decentralized Ethereum blockchain based platform that is most efficient blockchain for the Token economy. H2N is a platform created for buyers and sellers all over the world.

Mission

The main mission of Hypersonic Network (H2N) is to provide safe and secure transactions using the ETHEREUM blockchain platform. The maximum token in the crypto market is using the ETHEREUM blockchain. The safest way to do transactions and we are following the same method to grow the Hypersonic Network economy. Moreover, we have a smart quality token that will deal with the world's largest exchange platform. Hypersonic Network will create a huge market capitalization and will provide people a good solution to use the best ETHEREUM token-based platform. However, Hypersonic Network is given a chance to become a high-scale trading platform, wherever people will trade to create a revolution to grow the token economy, and help people to grow their wealth.

Why Hypersonic Network (H2N)

In finance, there is a natural supply and demand. However, over time the supply curve has been growing at an unprecedented rate. This is what we commonly refer to as inflation. The reason H2N was created is to have a cryptocurrency token. Used for transactions that is free from tax and fees that can be utilized anywhere in the world without any restrictions. Fiat currency is the primary form by

which nearly 99.99% of the population uses to complete transactions. H2N can be used as a primary form of payment not only on the Hypersonic network Marketplace, but also integrated to various vendor and supplier websites, eCommerce platforms and soon in - store to accept H2N as a form of payment. We believe overtime H2N will begin to stabilize being used for millions of transactions on a daily basis. Also in this regard, H2N will become a symbol of value using ETHEREUM Blockchain. As H2N begins to gain adoption, we believe the limited supply WITH 53M H2N in nature will provide a reverse effect to our current inflation model.

Our services

Our service offers great opportunities for self-employed entrepreneurs, small scale manufacturers, family businesses and makers of handmade crafts, including a selection of tools for direct customer feedback, bookkeeping, sales analysis, advertising and promotion, as well as a convenient, user-friendly interface peer to peer.

Roadmap

Q1 2019 Start planning
Platform concept

Q2 2019 Roadmap
V1 release
Publish idea with world

Q3 2019
Airdrop and selfdrop
Community building for long run
First services partner announcement

Q4 2019
Exchange listing
Development for increasing H2N value
Feedback gathering for platform optimization

Q1 2020
Announce exclusive campaign listings
Mobile wallet release

Q2 2020
Target price 20\$ per H2N
V2 rescue

Token information

- *Token name :Hypersonic Network
- *Token symbol :H2N
- *Token decimal :18
- *Total supply :53029000
- *Token contract :
0x4ddd5fc76fa654e15132c606c0d65d38056c4be9
- *Token type : ERC20

Selfdrop

Selfdrop event will be arranged by team only for exchange listing fee as well as token will be burn which are unsold token by the team and the other hand H2N created only for community to trade in open market to make it a valuable token and help Hypersonic Network to reach out their success. We have plan though we will burn and we will arrange a buy back program while H2N will be open for trade in the crypto exchange so our token will be with a new supply with huge demand. Circulating Supply 25 million only.

Use of funds

We are giving away total of 45% token for our community as well as 25% will be provided selfdrop for exchange fee and dev will hold until app release total of 15% but also others 10% for promote the projects and 5% for only team

- *Airdrop 45%
- *Team 5%
- *Dev 15%
- *Selfdrop 25%
- *Promotion 10%
